EDUCATION

Ghulam Ishaq Khan Institute (GIKI)

Bachelor of Science in Computer Science

Topi, Pakistan

Sep. 2024 – Present

EXPERIENCE

Data Analytics & Income Taxation Intern

OMC House (FBR Affiliated)

June 2025 – Sep. 2025

Karachi, Pakistan

- Processed and validated income tax documentation for **10+ client accounts** in compliance with FBR regulations, reducing manual review time by **20%**.
- Applied Python (pandas, NumPy) to analyze **3+ months** of financial datasets across **5+ portfolios**, generating structured reports that improved decision-making accuracy by **15%**.
- Developed **2 reusable Python scripts** to automate repetitive data entry tasks, saving approximately **5 hours/week** of manual effort.

Core Team Member (GDGoC)

Google Developer Group on Campus, GIKI

Oct. 2025 – Present

Topi, Pakistan

- Planned and executed **3+ technical workshops and hackathons** bridging academia and industry, reaching **100+ student participants** per event.
- Coordinated a **core team of 8+ members** for end-to-end event logistics including speaker coordination, scheduling, and post-event feedback collection.
- Contributed to skill-building initiatives that achieved an average post-event satisfaction rating of **4.2/5** across sessions.

Sub-Head – GIKI Mathematics Society (GMS)

Ghulam Ishaq Khan Institute

Nov. 2024 – Present

Topi, Pakistan

- Led organizational efforts for **4+ math competitions** and academic sessions, managing a team of **10+ members**.
- Coordinated **2+ inter-departmental** problem-solving events, increasing society participation by **25%** over 1 semester.

PROJECTS

House Valuation System – FBR Compliance | Python, pandas, NumPy, Data Analytics

June 2025 – Present

- Built a Python-based house valuation tool aligned with FBR property tax regulations, automating valuation calculations across **100+ property records** for compliance reporting.
- Leveraged pandas and NumPy to clean and process **5+ financial datasets**, reducing manual computation time by **40%** and generating structured tax documentation reports.
- github.com/hamziAli/House_Valuation-FBR-

Plant Growth & Harvesting Monitoring System | ESP32, C++, HTTP, REST API, Backend

Nov. 2025 – Present

- Integrated **3+ sensor types** (soil moisture, temperature, humidity) with ESP32 microcontrollers, achieving real-time data transmission at **5-second intervals** to the backend server.
- Implemented RESTful HTTP communication with **99%+ uptime** reliability, transmitting **1,000+ data points/day** for continuous crop monitoring across **2+ test environments**.

TECHNICAL SKILLS

Programming Languages: Python, C/C++, HTML/CSS, R, Bash

Libraries & Frameworks: pandas, NumPy, Matplotlib, ESP-IDF

Developer Tools: Git, GitHub, VS Code, Visual Studio, Google Cloud Platform, Linux

Technical Concepts: OOP, Data Structures & Algorithms, IoT (ESP32), REST APIs, HTTP Protocols, Digital Logic, Statistical Analysis

Professional Skills: FBR Tax Compliance, Data Analytics, Technical Documentation, Event Management, Project Management, Leadership, Cross-functional Collaboration
